

Model View Controller

How does the Model View Controller communicate with each other?

View communicate korbe Controller er sathe (actually controller er method er sathe). Pura application er shob business logic jane shudhu controller. View/model er kase kono business logic thake na. Erpor controller model (here, student data table) e view er html ta add kore dey.

Features of MVC

- Easy and frictionless testability. Highly testable, extensible and pluggable framework
- To design a web application architecture using the MVC pattern, it offers full control over your HTML as well as your URLs
- Leverage existing features provided by ASP.NET, JSP, Django, etc.
- Clear separation of logic: Model, View, Controller. Separation of application tasks viz. business logic, UI logic, and input logic
- Supports for Test Driven Development (TDD)
