Introduction

INTRODUCTION

The contents of this course is based on:

- Heike Hering. *How to write technical Reports*. Jan. 1, 2019. DOI: 10.1007/978-3-662-58107-0. URL: <https://doi.org/10.1007/978-3-662-58107-0>

WHAT IS A TECHNICAL REPORT?

A Scientific or Technical Report describes a research process or research and development results or the current state-of-the-art in a certain field of science or technology.

EXAMPLES OF TECHNICAL REPORTS

- report about internships
- report about laboratory experiments, testing and measurements
- construction and design report
- various theses like project, diploma, magister, bachelor, master, doctorate thesis/dissertation
- article or report about research work in scientific journals
- project report, intermediate, or final report etc.
- functional description, user manual, software documentation, etc.
- patent
- functional specifications and functional requirements
- ... and many others

Technical Report

Report about technical subjects, written in the
“language of science and technology”
(special terms and phrases, display rules, etc.)

ASPECTS OF A TECHNICAL REPORT

A technical report requires **three** aspects to bring clarity to the readers:

ASPECTS OF A TECHNICAL REPORT

A technical report requires **three** aspects to bring clarity to the readers:

1. Clarity of the technical or scientific statement (prerequisites, facts, figures, findings, conclusions, own statements)

ASPECTS OF A TECHNICAL REPORT

A technical report requires **three** aspects to bring clarity to the readers:

1. Clarity of the technical or scientific statement (prerequisites, facts, figures, findings, conclusions, own statements)
2. Clarity of what is already known and what is new as well as,

ASPECTS OF A TECHNICAL REPORT

A technical report requires **three** aspects to bring clarity to the readers:

1. Clarity of the technical or scientific statement (prerequisites, facts, figures, findings, conclusions, own statements)
2. Clarity of what is already known and what is new as well as,
3. Clarity of what has been worked out by the author.

Imagine you are a reader who has basic technical knowledge, but no detailed knowledge about the topic or project described in the Technical Report. This fictive reader shall understand the Technical Report without any question!
