Assignment - Announcement

Md. Bakhtiar Hasan, Assistant Professor, CSE • Nov 21, 2024

Based on the information provided by the CRs, we will be doing a group assignment that will count towards Quiz #4. As discussed before, the task will be to create comprehensive lecture notes for the course. This assignment aims to consolidate your understanding of the lectures while contributing to a valuable resource for future students.

Topic

Each group will create lecture notes for one of the ten topics covered so far in the course:

- Uninformed Search
- Informed Search
- Constraint Satisfaction Problem I
- Constraint Satisfaction Problem II
- Adversarial Search
- Uncertainty and Utilities
- Markov Decision Process I
- Markov Decision Process II
- Reinforcement Learning I
- Reinforcement Learning II

The prepared lecture notes should serve as a companion to the provided slides and will include detailed explanations, examples, and observations in a clear and structured format.

Group Formation

The class will be divided into 10 groups, with each group focusing on one topic. Each group will consist of 7 members. Both intra- and inter-section groups are allowed. The top students (based on the performance so far as shown in the shared Google Sheet) are encouraged to form separate groups to ensure a fair distribution.

Topic Selection

To form the groups, fill out the Google Form linked below. One student from each group will fill out the form. You have to provide the name of the group, student IDs of the students in the group, and a few preferred topics, ranked in order of priority (e.g., 1st choice, 2nd choice, etc.). Each choice should be different, otherwise your choice will be discarded. We will try our best to allocate topics based on your preferences, but it is not guaranteed that every group will get their 1st choice. The deadline for the form submission is **November 22, 2024 (Friday) 02:30 P.M.**

Resources to be Provided

- Lecture Slides
- Images used in the slides
- Voice recordings of the classes
- AI-generated transcripts of the recordings

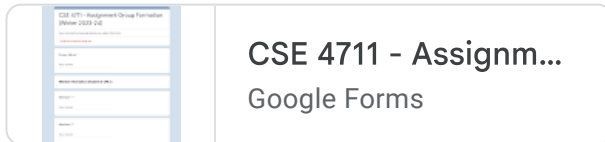

- Rubrics/Marking Criteria
- A common LaTeX template for formatting

focus on both group and individual efforts. The assignment not only aims to reinforce (pun not intended) your learning but also provides an excellent opportunity to enhance your teamwork and documentation skills. Remember, this is as much about learning and sharing knowledge as it is about creating a resource to support future students!

Assignment - Submission

Md. Bakhtiar Hasan, Assistant Professor, CSE • Feb 4

15 points

Due Mar 6, 8:00 PM

Submission Deadline *(Notice the unusual deadline)*

Date: March 06, 2025

Time: 08:00 PM

Submission

One member from each group will submit:

- A **ZIP File** titled "GroupName_Topic.zip" -> It should contain the source files (e.g., .tex, .bib, figures, codes, etc.) and any additional files needed to compile the LaTeX document of the lecture note. Example file name: "TeamLectureMaker_MarkovDecisionProcessII.zip"
- A **PDF File** titled "GroupName_Topic.pdf" -> It should be the generated PDF lecture note. Example file name: "Powder_AdversarialSearch.pdf"

The rest of the members can "Turn In" the empty assignment if that bothers you.

Resources

You are encouraged to use the resources in the linked **Assignment Materials** Google Drive folder. It contains:

- The images from the slides.
- Voice recordings of the lectures.
- AI-generated transcripts of the recordings.

You are also provided with a **LaTeX template** (Zip and PDF attached) to ensure uniformity in the formatting and presentation of your lecture notes.

Rubrics

The grading will follow a detailed rubric, with marks distributed as follows:

Group-Based Rubrics (9 marks)

- [4 marks] Content Quality and Coverage - The notes should comprehensively cover all topics and subtopics, with clear explanations, examples, formulae, and terminologies.
- [3 marks] Structure, Organization, and Flow - Ensure logical progression of ideas, proper sectioning, and transitions.
- [2 marks] Visual Aids and Formatting - Incorporate relevant visual aids and adhere to the LaTeX template.

Individual Contribution Rubrics (6 marks)

- [3 marks] Active Contribution - Assessed based on peer reviews regarding participation and effort
