

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0001	Create a customer object	Customer Creation	1.Go to the Application 2.enter 4 to register as a passenger 3. Enter credentials	Name: "Namisa Najah" Email: "namisa@najah.com" password: 123456789 phone: 0123456789 address: AAA Age: 23	High	Customer created	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0002	Detect existing email	Email validation	1.Go to the Application 2.Enter 4 3. Enter credentials but with an existing email address	Email: "namisa@najah.com"	High	Shows proper error message. "Email exists. Enter a different email."	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0003	New email acceptance	Email validation	1.Go to the Application 2.Enter 4 3. Enter credentials.	Email: "new@gmail.com"	High	Creates a customer with given email	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0004	Format customer string output	Data Formatting	1.Go to the application 2. log in as passenger 3. Enter 2 to update data 4. check the table		Medium	Shows the user id as "xxx"{space}xxx" format	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0005	Book a flight	Flight Management	1.Go to the application 2.log in as a passenger 3. enter 1 to book a flight 4. choose a flight option	Flight: "MP-135"	High	Flight appears in list	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0006	Overbooking prevention	Flight Management	1.Go to the application 2.log in as a passenger 3. enter 1 to book a flight 4. choose a flight option 5. Book for {available seats+1} tickets		Medium	Shows proper error message. "Ticket overbooked."		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	
TC-0007	Update existing flight tickets	Flight Management	1.Go to the application 2. Log in as a passenger 3. Enter 1	Initial: 1, Added: 2	High	Total becomes 3	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0008	Delete customer from system	User Management	1.Go to the application 2. log in as a passenger 3. Enter 3 to delete account		High	Collection size decreases		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0009	Calculate valid distances	Distance Math	1. Go to the application 2. log in as passenger 3. book a flight		High	Shows the correct distance	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2
TC-0010	Display flight guidelines	UI Output	1. Go to the application 2. log in as passenger 3. enter 4	Email: namisa pass:123456	Low	Displays "GUIDELINES" text	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0011	Booking flight reduces seats	Reservation System	1. Go to the application 2. log in as passenger 3. book a flight	Flight: 'MP-135' initial seats: 135	High	1.Seats decrease by 2 2. available seats after booking:133	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0012	Cancel flight restores seats	Reservation System	1. Go to the application 2. log in as passenger 3. book a flight 4. Cancel flight	Flight num: DI-160 initials seats: 160	High	1.Seats increase by 2 after cancelling 2 seats 2.available seats after booking 157 3.available seats after cancelling 159	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0013	Display flight passengers	UI Output	1. Go to the application 2. log in as admin 3. enter 6 to see all the flights booked by a passenger	username: admin pass: admin123	Medium	Shows the flights booked by a passenger	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0014	Show all registered users	UI Output	1. Go to the application 2. log in as admin 3. enter 5 to see all the passengers	username: admin pass: admin123	Low	Displays all the "Registered Passengers"	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2
TC-0015	Show specific flight users	UI Output	1. Go to the application 2. log in as admin 3. enter 7 to check passengers for a specific flight	Flight: "MP-235"	Medium	Contains flight ID and the passengers for that flight	Failed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0016	Format user header correctly	UI Formatting	1. Go to the application 2. log in as admin 3. enter 5	username: admin pass: admin123	Low	Contains "Passenger Names"	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0017	Search for a specific passenger	Passenger search	1. Go to the application 2. Log in as admin 3. Enter 2		Low	Displays the passenger with the entered {ID}		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	
TC-0018	Display flights for one user	UI Output	1. Go to the application 2. log in as passenger 3. Enter 6 to check flight information for logged in user	email:raisa pass:123456	Medium	Contains flight details for 'raisa'	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0019	Select unique destinations	Route Planning	1. Go to the application 2. log in as a passenger 3. enter 4		High	Origin ≠ Destination	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2
TC-0020	Generate valid seat count	Capacity Planning	1. Go to the application 2. log in as passenger 3. enter 4	Email:raisa pass:123456	High	235 seats	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0021	Format flight number correctly	ID Formatting	1. Go to the applicaiton 2. log in as passenger 3. enter 4 to check flight schedule		Medium	Matches "XX-{digits}" pattern	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0022	Authenticate valid admin	Admin Auth	1. Go to the application 2. log in as admin 3. Enter correct credentials	User: "admin", Pass: "admin112"	High	Log in successful and goes to the 2nd layer menu	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0023	Reject invalid admin	Admin Auth	1. Go to the applicaiton 2. log in as admin 3. enter wrong credentials	User: "wrong", Pass: "credentials"	High	"Shows error message. "Admin not found. Try again."	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2
TC-0024	Manually select flight destinations	Flight Management	1. Go to the application 2. log in as passenger 3. book a flight 4. try to choose destination manually		Medium	Should allow user to enter manual source and destination		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0025	Authenticate valid passenger	User Auth	1. Go to the applicaiton 2. log in as a passenger 3. enter correct creadentials	Email: "namisa@najah.com", Pass: "stupefy"	High	Log in successful and goes to the 2nd layer menu	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0026	Reject invalid passenger	User Auth	1. Go to the application 2. log in as a passenger 3. Enter with wrong credentials	Email: "wrong@credits.com" Password: 112112	High	"Shows error message. "user not found. Try again."	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0027	Reject empty credentials	Input Validation	1. Go to the application 2. log in as a passenger	User: "", Pass: ""	Medium	Shows error message. "user not found. Try again."	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2
TC-0028	Enforce case-sensitive passwords	Security	1. Go to the Application 2. log in as a passenger 3. enter password in opposite case	Password: "STUPEFY"	Medium	Shows error message. "user not found. Try again."	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0029	Calculate flight time format	Time Calculation	1. Go to the application 2. log in as a passenger 3. Enter 4	Email: namisa@najah.com	Medium	Displays the correct time in "HH:mm" format	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0030	Display the usermanual guide	UI output	1. Go to the application 2. Enter 5		Low	Displays the user manual correctly		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	
TC-0031	Check valid arrival time	Time Calculation	1. Go to the application 2. log in as a passenger 3. Enter 4	Email: namisa@najah.com	Medium	Shows the timetable.	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	3
TC-0032	Delete flight from system	Flight Management	1. Go to the application 2. log in as admin 3. Enter 8	Flight id: [generated]	High	Flight removed from list	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	2

Test Case ID	Test Case Summary	Related Requirement	Test Procedure	Test Data	Priority	Expected Result	Actual Result	Status	Remarks	Test Case Author	Executed By	Test Environment	Frequency
TC-0033	Display flight schedule	UI Output	1. Go to the application 2. log in as passenger 3. Enter 4		Low	Displays the existing flight schedule	Passed	Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework	1
TC-0034	Data should be present after restarting the application	Data persistence verification	1. Go to the applicaiton 2. Input some data 3. restart the application 4. enter the previous data		Low	Should show the correct data		Not Executed		Namisa	Namisa	OS: Windows11 Server Info: Device Info:Dell Laptop IDE: Visual Studio Testing Environment: XUnit Others: Programming language C#, .NET Framework
