

UX Testing Prototypes

Research study

A step-by-step examination of a group of users and their needs, which adds realistic context to the design process

- Plan a research study
- Conduct research with a usability study
- Analyze and synthesize research results
- Share and promote research insights
- Modify designs based on research insights

Usability study

A research method that assesses how easy it is for users to complete core tasks in a design

Elements of a UX research plan

What led you to conduct this research?

Project Background

What are the questions your research is trying to answer?

Research Goals

What do want to learn from the research?

Research Questions

Key Performance Indicators (KPIs)

How can you measure your progress toward the research goal?

How will you collect data and how will you analyze the data once you get it?

Methodology

Participants

Who will you survey?
What characteristics do the participants have?

Script

Project background

We're creating a new app to help people find and schedule dog walkers. We need to find out if the main user experience, finding and scheduling a dog walker, is easy for users to complete.

Research goal

Determine if the dog walker app is difficult to use

Research questions

- How long does it take a user to find and book a dog walker in the app?
- On average, how many times a week does a user hire a dog walker through the app?
- What frustrated users most about finding a dog walker through the app?

Key performance indicator (KPI)

Percentage of users who book a dog walker

Methodology

- Conduct a survey of prospective users
- Use a spreadsheet and identify trends

Participants

Dog owners with full-time jobs and who go out for activities more than once a week

Getting started

- Welcome participants
- Thank participants for their time
- Get consent to record
- Learn the participant's basic information
- Remind participants they are not being tested
- Let participants ask questions

Usability tasks

- Based on research goals
- Specific
- Make participants take action
- Avoid providing clues on how to complete the task

Conclusions

- Ask clarifying questions
- End the recording
- Thank the participant
