Contents

1	Component List	2
1.1	Custom Iconography	2
1.2	Components	3
2	Color Palette	18
3	Inspirations	18
4	Some explanations about the pages created	18

1 Component List

1.1 Custom Iconography

1. Add users (follow)
2. Play button (music window)
3. Back button (to maintain consistency across the screens)
4. No (slider no option)
5. Dark (dark mode icon for the slider)
6. Save (Used a star shape to indicate saved posts)
7. Setting (to maintain consistency across the screens to go to the *setting* screen)
8. Search (to maintain consistency across the screens)
9. Audio (music window)

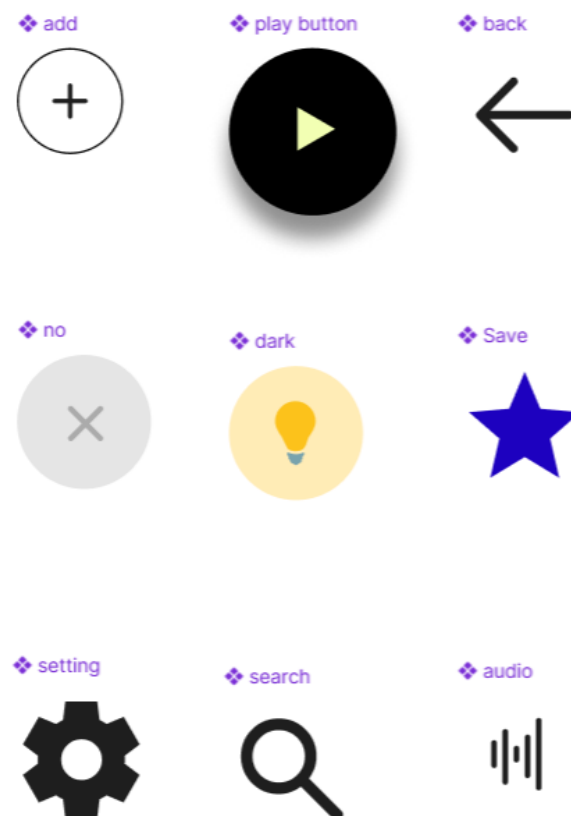

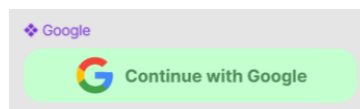

Figure 1: Iconography

1.2 Components

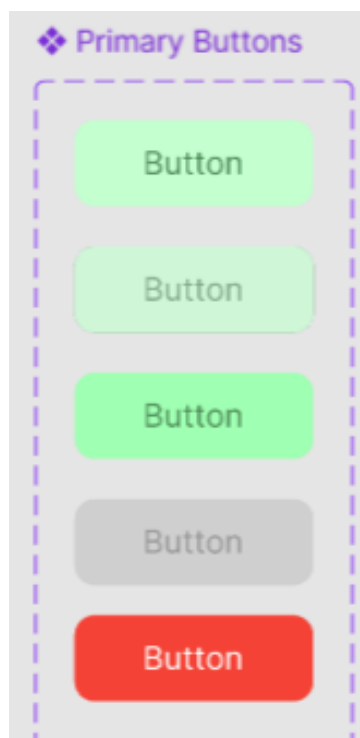

1. **App icon:** The main app icon of **Candid** app.

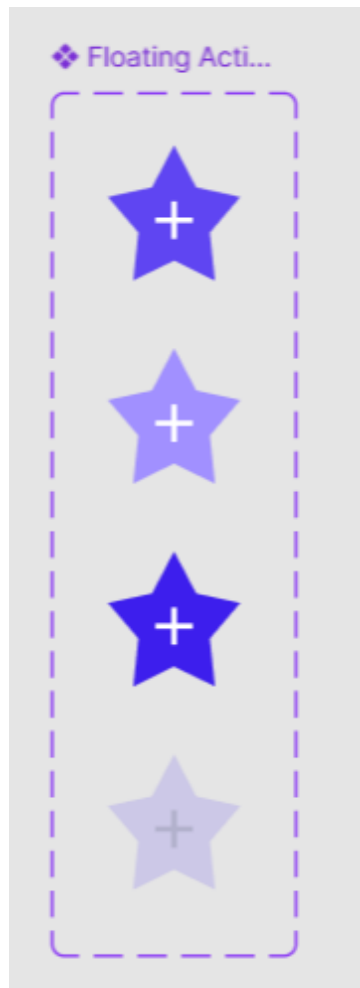

2. **Continue with google button**

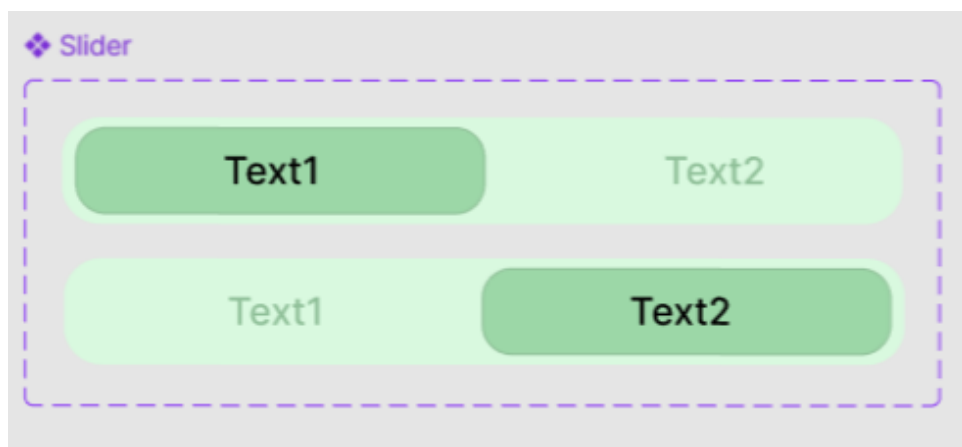

3. **Buttons:** 5 variants: default, hover, active, disabled, error.

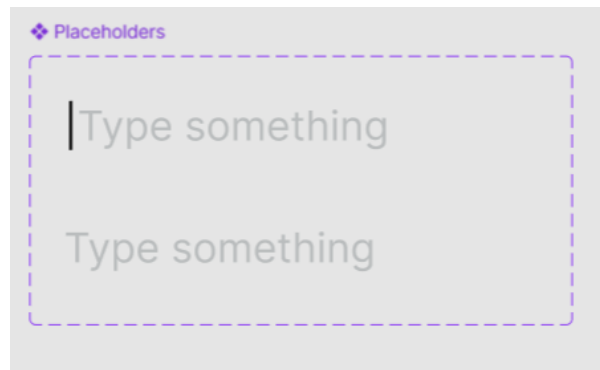

4. **Floating buttons:** 4 variants: default, hover, active, disabled.

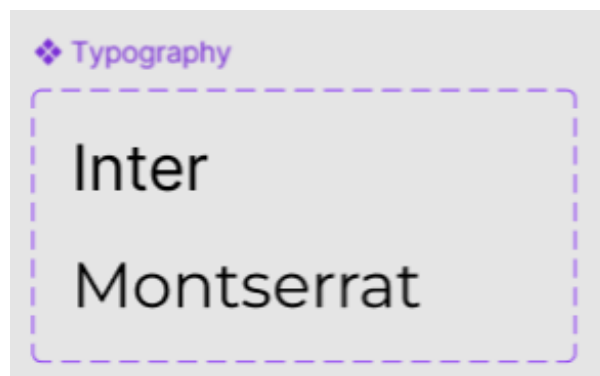

5. Slider

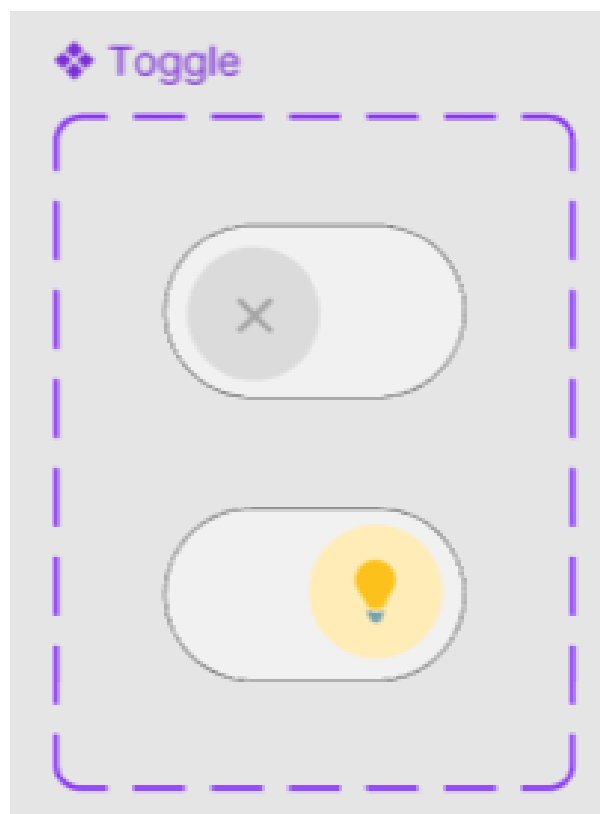

6. Placeholders

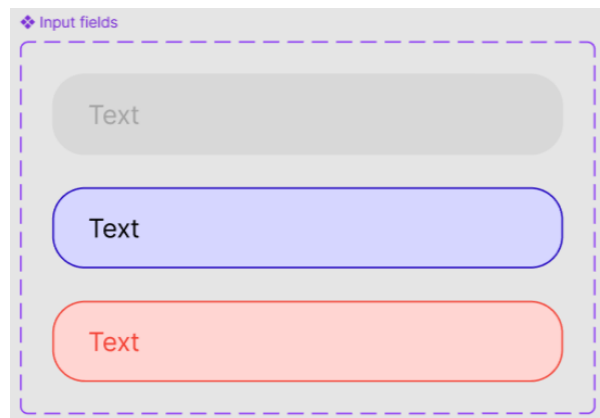

7. **Typography:** 2 Fonts: Inter, Montserrat

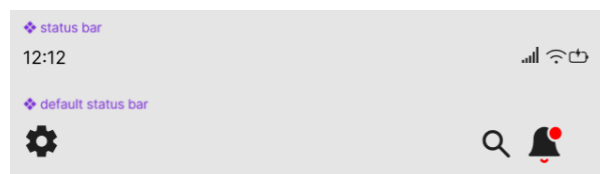

8. **Toggle button**

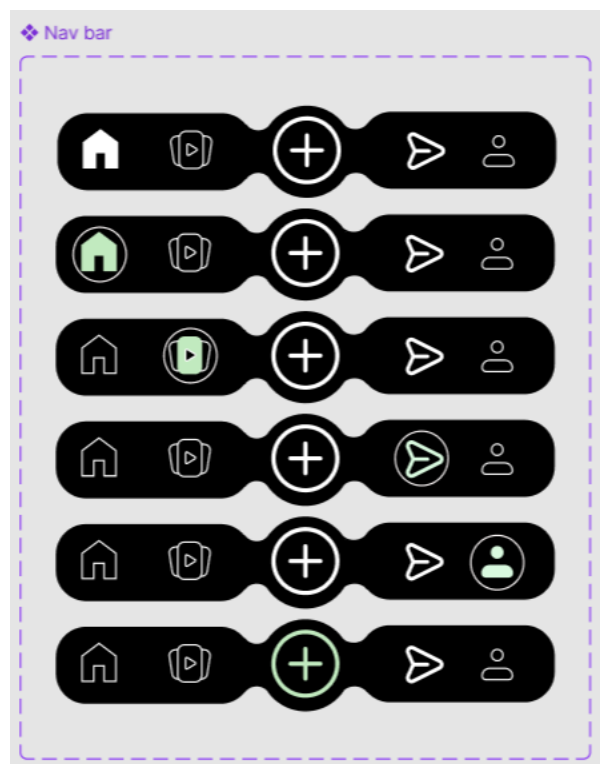

9. **Input fields:** 3 variants: Default, active, error.

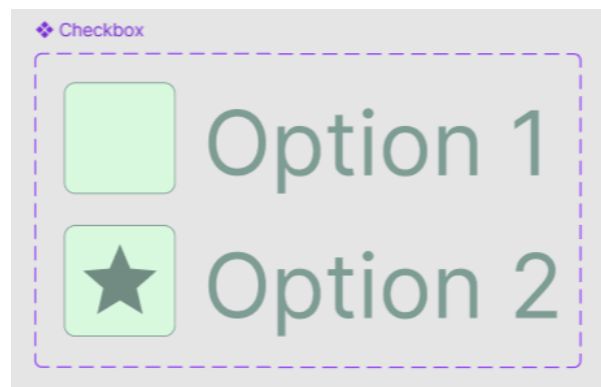

10. **Status bars**

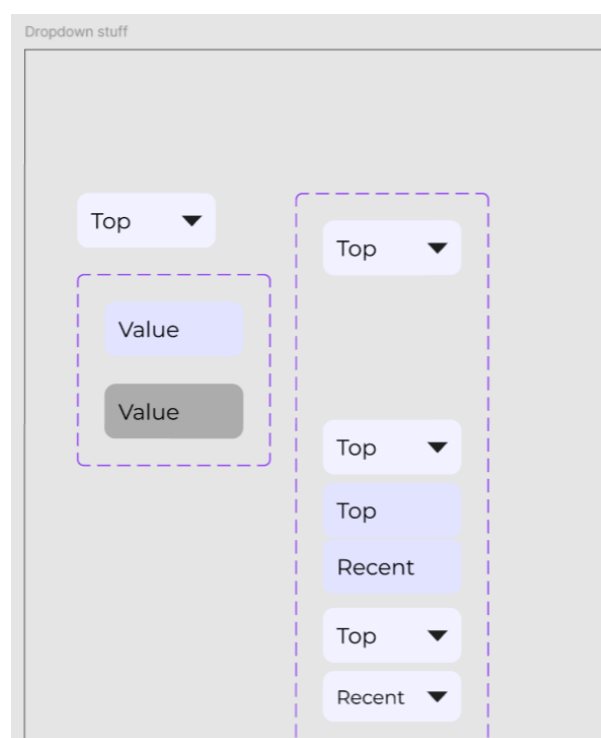

11. **Navigation bar:** Home, shorts, post, message, profile.

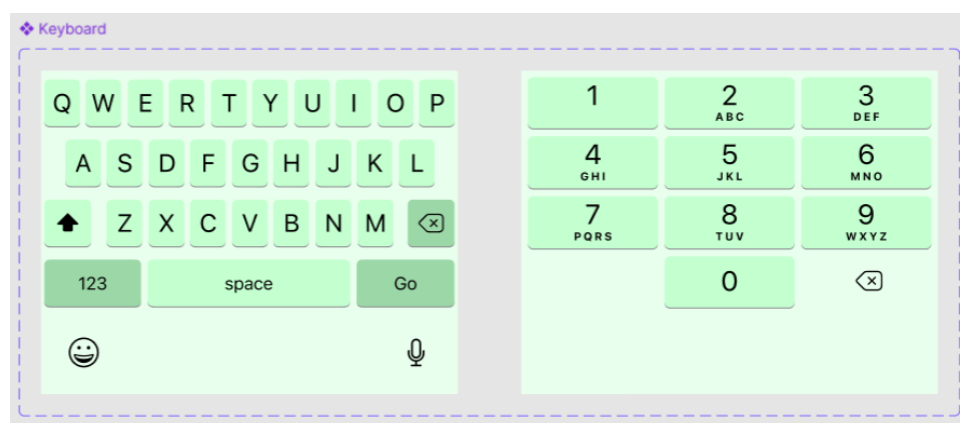

12. **Checkbox**

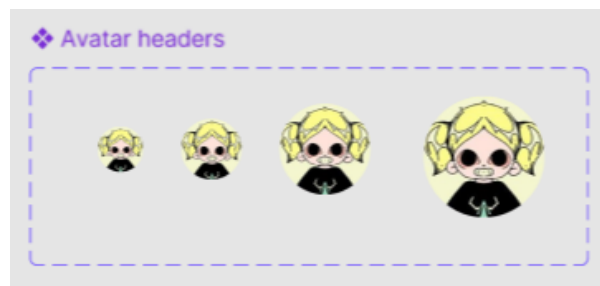

13. Dropdown

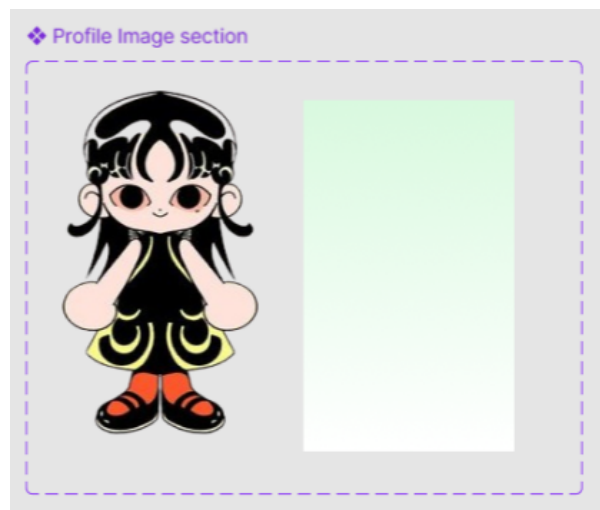

14. Keyboard

15. **Avatar heads:** 4 sizes

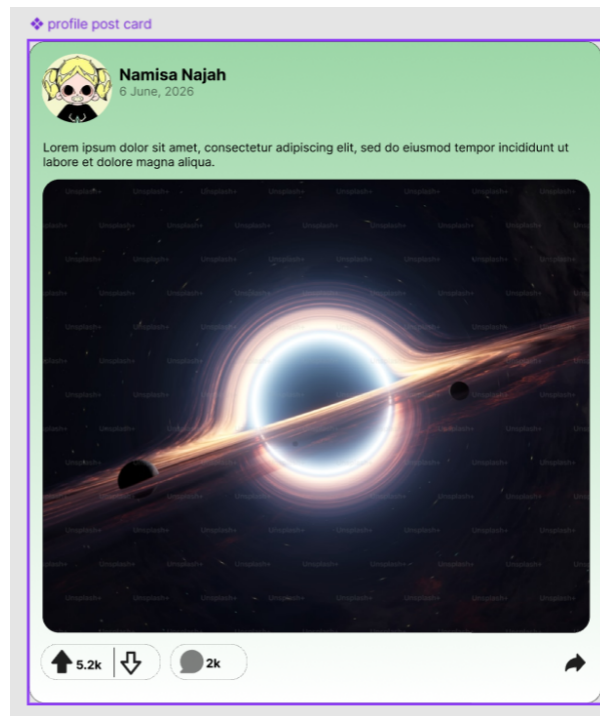

16. **Profile banner section**

17. **Posts collection:** 2 variants: default, selected.

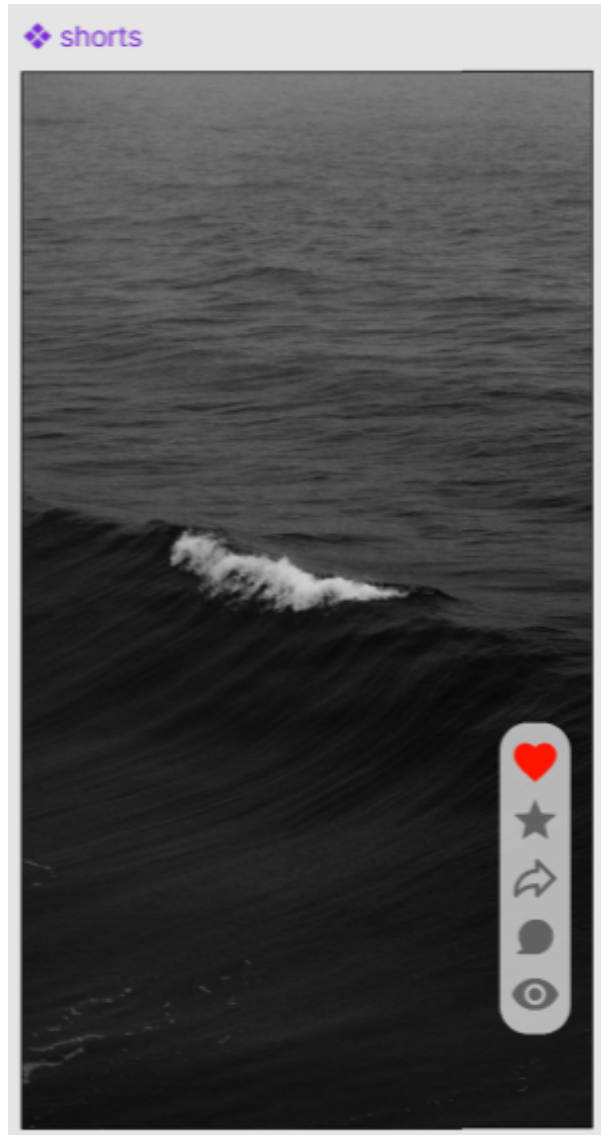

18. **Profile saved posts section**

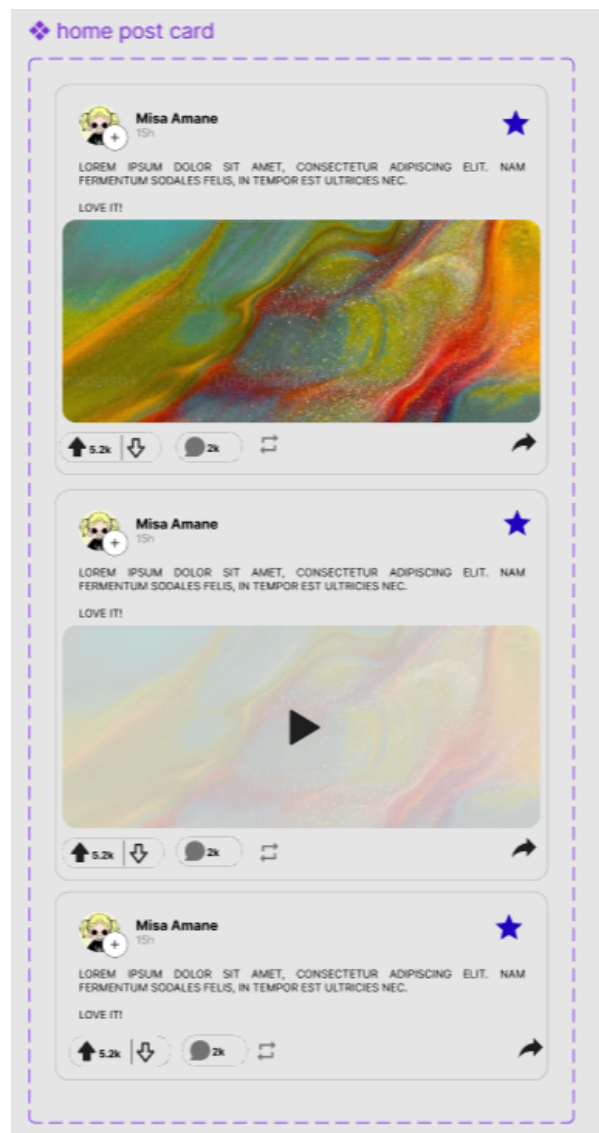

19. Profile shorts preview

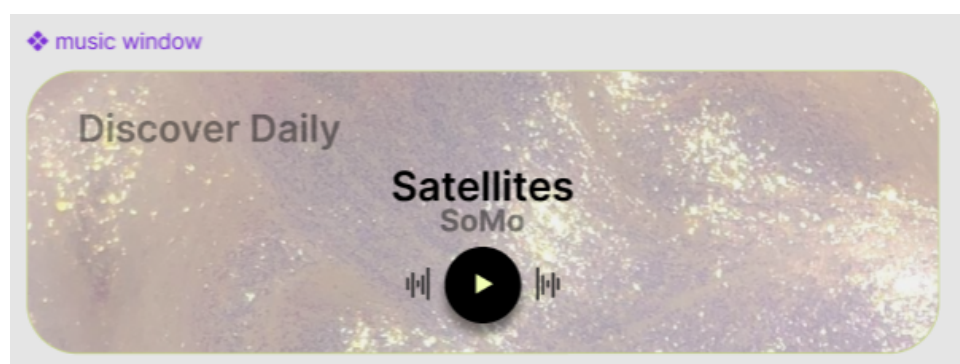

20. **Shorts window:** Has the interaction drawer on the right side as well.

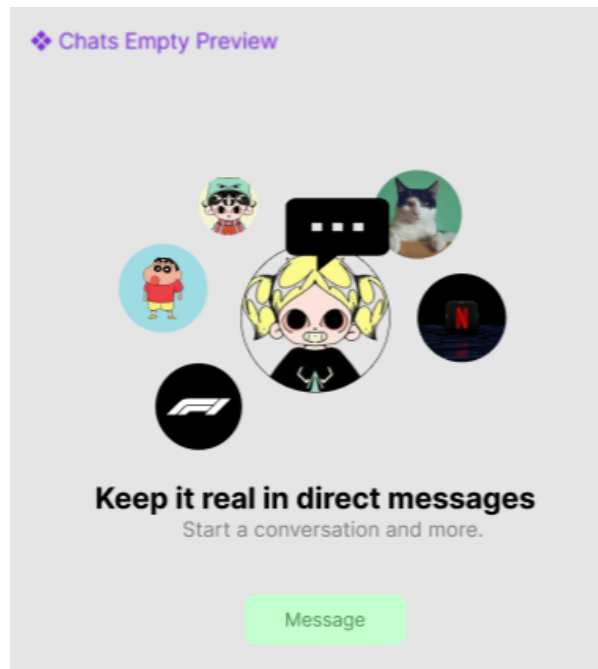

21. **Home page Posts:** 3 variants: image, video, text.

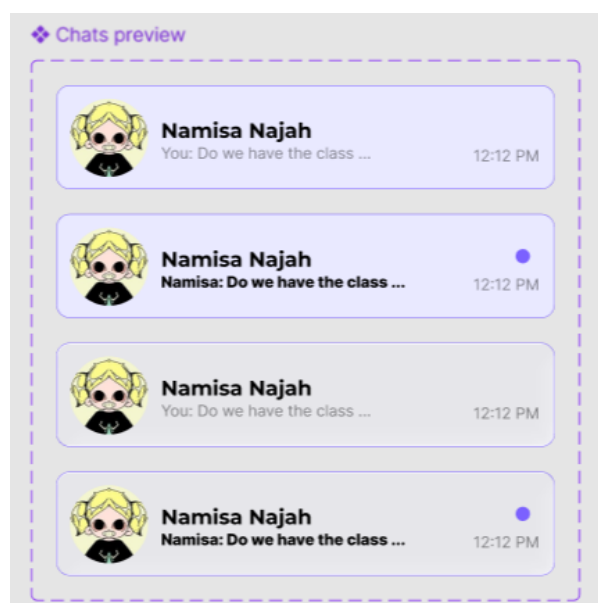

22. Music preview

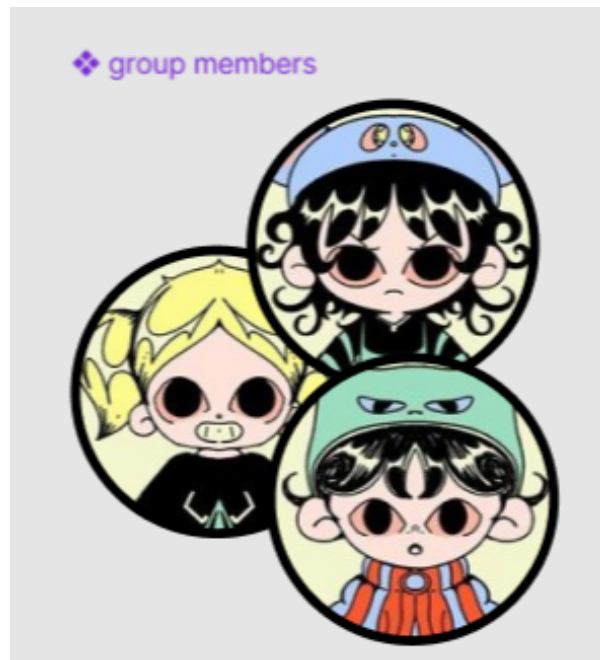

23. Empty chatroom

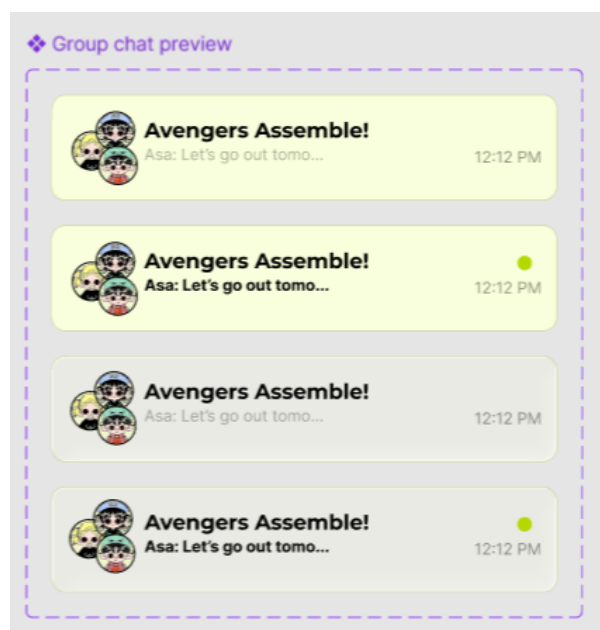

24. **Chat preview:** 4 variants: read, unread, selected read, selected unread.

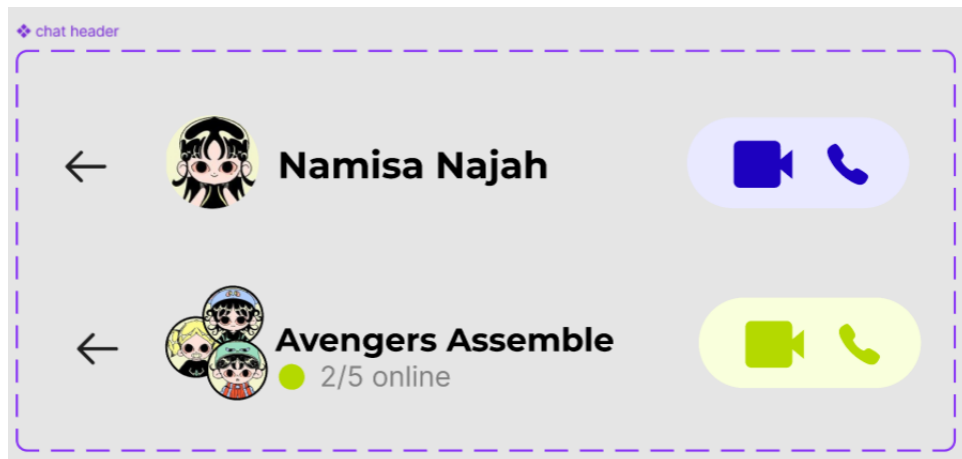

25. **Group members**

26. **Group chat preview:** read, unread, selected read, selected unread.

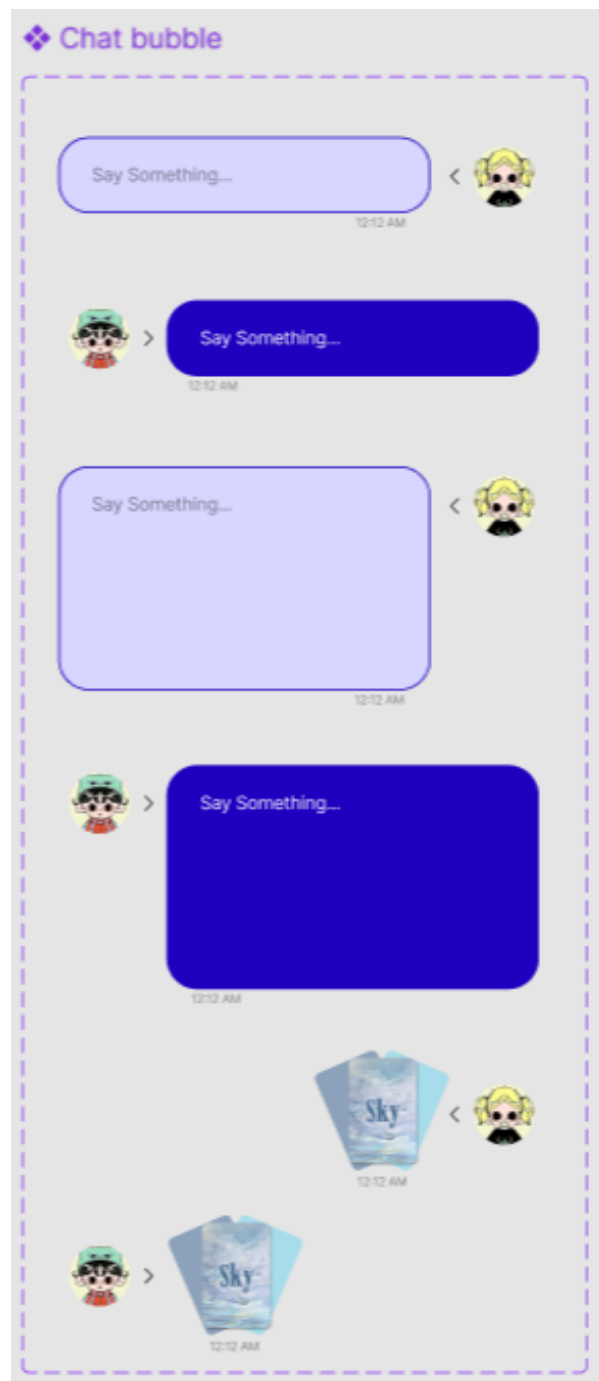

27. **Chat page status bar:** 2 variants: individual, group.

28. **Message page nav bar:** 5 variants: default, emoji, audio, image, file.

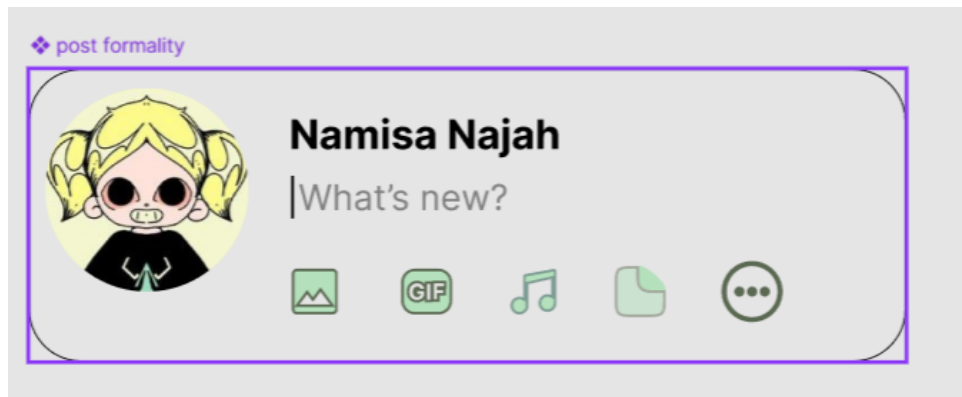

29. **Chat bubble:** 6 variants: sender, sender long text, sender file, receiver, receiver long text, receiver file.

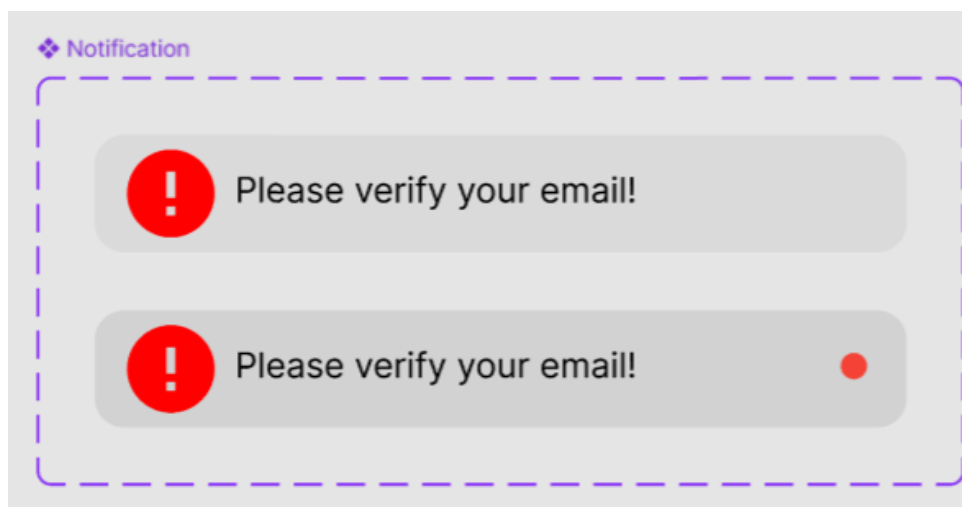

30. Comment

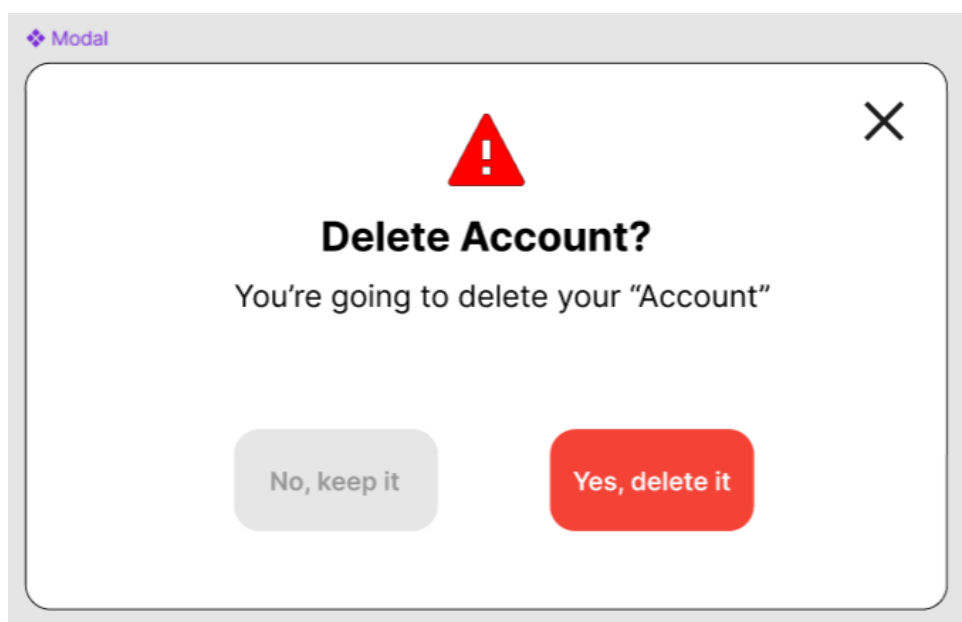

31. Post page - post window

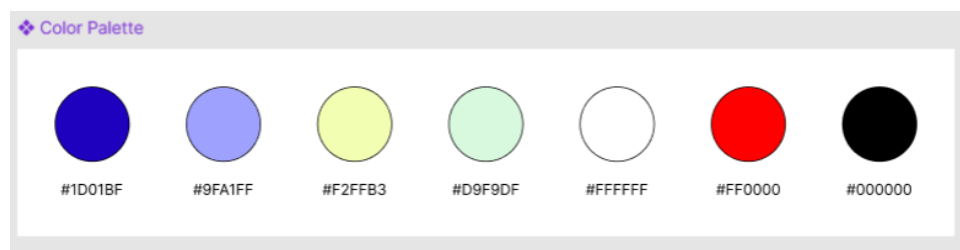

32. **Notification text:** 2 variants: read, unread

33. **Modal**

2 Color Palette

- #1D01BF (Royal blue)
- #9FA1FF (Lavender)
- #F2FFB3 (Yellow)
- #D9F9DF (Mint)
- #FFFFFF (White)
- #FF0000 (Red)
- #000000 (Black)

I wanted to keep the color palette clean, basic and warm but minimalistic. So it doesn't overwhelm the users.

I wanted the deep royal blue to carry authority and trust without feeling cold or corporate. People are sharing parts of their lives, and this color quietly communicates that the platform is reliable and worth investing in emotionally.

The lavender and mint - these pastel accents feel calm and welcoming, they don't exhaust the eyes after scrolling for an hour. They bring a sense of lightness and modern approachability, which matters when the app is supposed to feel like a space people want to spend time in.

The pale yellow-green adds a touch of warmth and energy.

White gives the whole UI room to breathe.

I kept Red and black in reserve for moments that need weight — notifications, errors, emphasis, bold typography. They're not decorative colors here; they're functional punctuation.

3 Inspirations

- **Pinterest:** Reference pictures for certain profile pictures and background images.
- **Youtube:** I watched videos to learn how to make certain components like dropdown and toggle buttons.

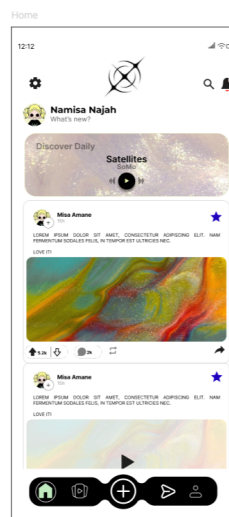

4 Some explanations about the pages created

The pages I created:

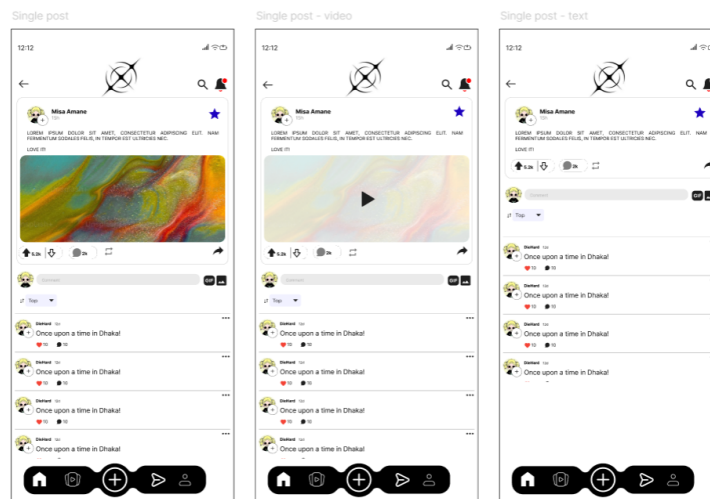

1. Log-in/sign-in page

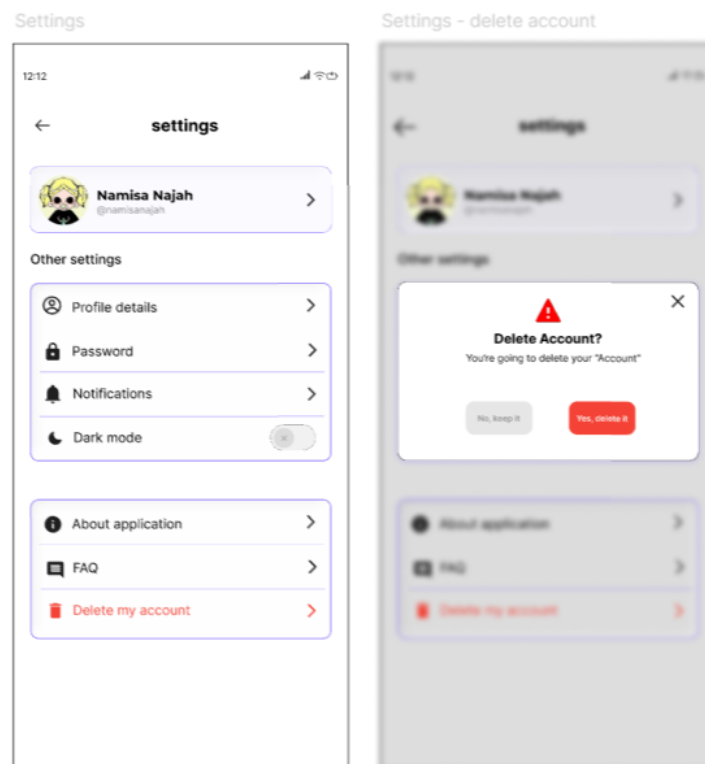

2. Home page

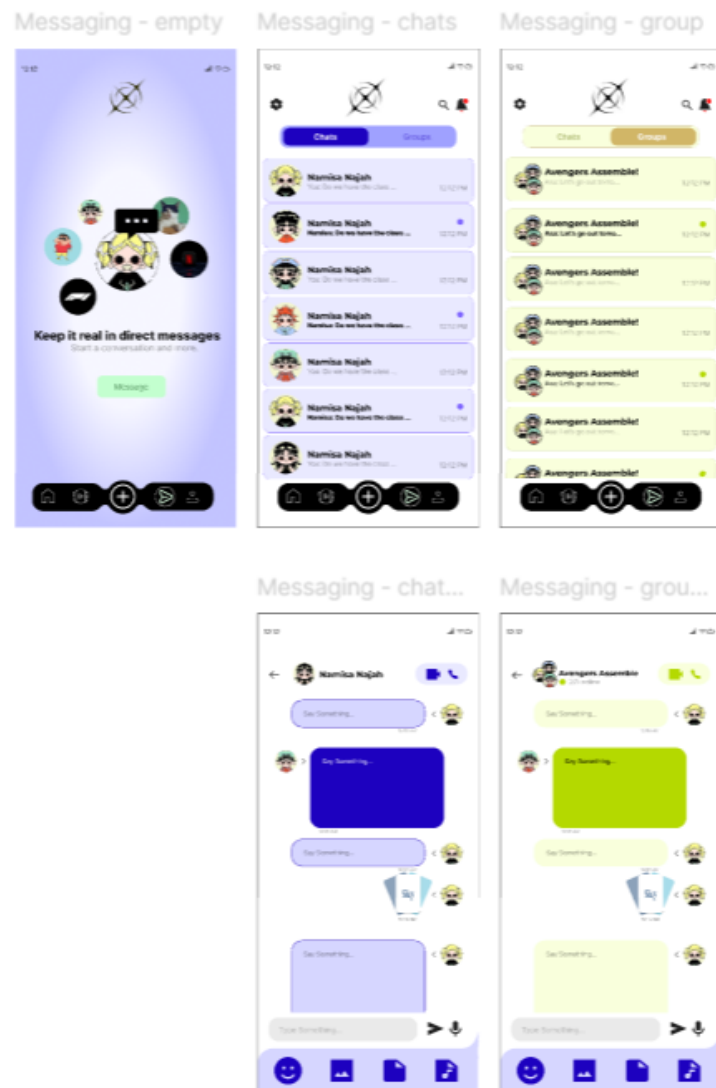

3. Posts page (with comment section)

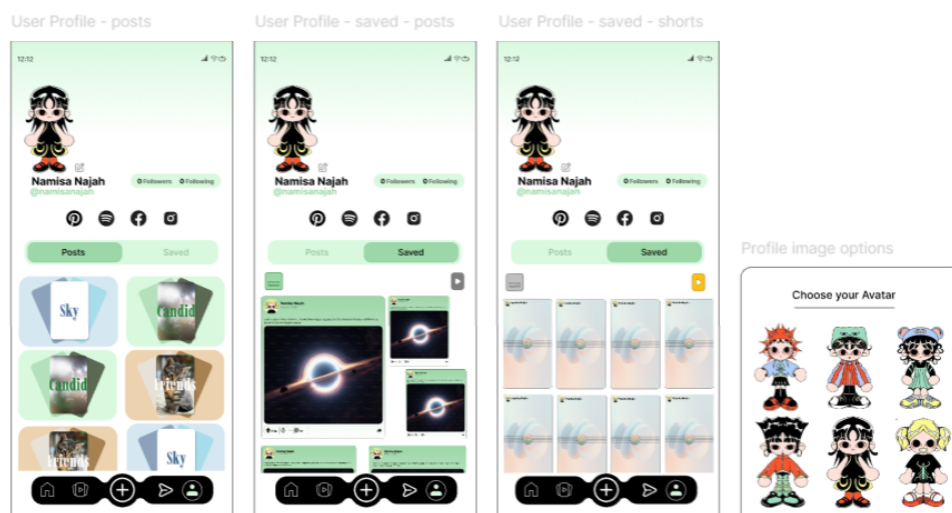

4. Settings page (Action modal like delete account)

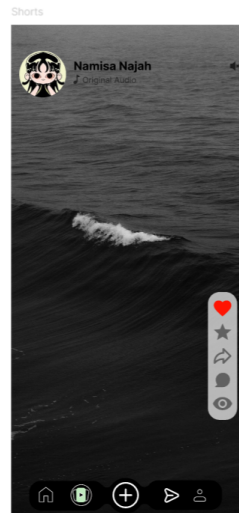

5. Messaging pages (with individual and group conversation pages)

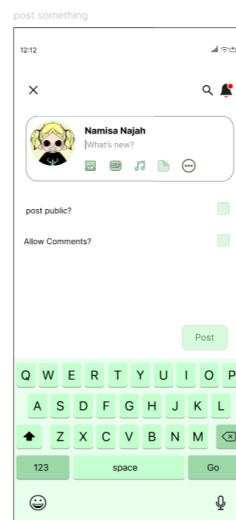

6. Profile pages (with the saved and posts of users. Also editable user avatars modal)

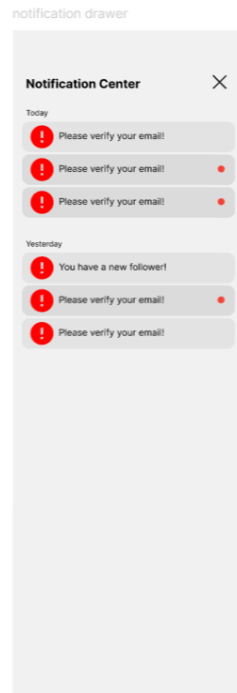

7. Shorts page

8. Upload post page

9. Notification drawer
