Assignment 1

Analysis of a Cybersecurity Incident

Aashnan Rahman
Junior Lecturer, CSE

Date: February 20, 2026

Analysis of a Cybersecurity IncidentProject Title

We often read news about cybersecurity incidents in the media, such as data breaches, ransomware attacks, or phishing scams. For this assignment, you will be assigned one specific type of cybersecurity incident and required to conduct a detailed analysis. Your analysis should address the following aspects:

- Your assigned Cyber security topic number is *(last two digits of your ID%10)+1*. Based on this number, select the corresponding category from the list
 1. Cyber Espionage
 2. Computer Virus
 3. Ransomware
 4. Botnet Attack
 5. Spyware
 6. Phishing Attack
 7. Identity Theft / Spoofing
 8. Social Engineering Attack
 9. Zero-Day Attack
 10. Backdoor Attack
- For each selected category, choose **one real-world incident that occurred between 2020 and the present**.
- Structure your analysis using the following format:
 - i) Brief Summary
 - ii) Incident Title and Date or Period
 - iii) Detailed Description of the Event
 - iv) Root Cause / Vulnerability Exploited
 - v) Damage Caused (Financial, Operational, Reputational, etc.)
 - vi) Detection Method
 - vii) Recovery Process
 - viii) Preventive Measures and Lessons Learned (for the future)
 - ix) References (News Articles, Research Papers, Official Reports, or Credible Sources)
- Please note that -
 - You are allowed to use AI tools, but use AI responsibly. In other words, you are allowed to take help but
 - Don't make it obvious that you have taken help from AI.**
 - All sources must be properly cited.
 - The report should be well-structured and professionally formatted.
 - Verify all information to ensure accuracy, relevance, and factual correctness.

Criteria	Marks
Content Accuracy and Relevance	5
Insight and Depth of Analysis	10
Structure and Presentation	3
References and Citation Quality	2
Originality and Uniqueness	5
