Software Testing and Quality Assurance

Lab 4

Prepared By Maliha Noushin Raida, Lecturer, CSE
Islamic University of Technology

Bug Report

- ❖ The report is the primary communication between an engineer and their stakeholders about what's broken, why it's broken, and how to fix it.
- ❖ Information must be included in the Bug ticket
 - Steps to reproduce the bug
 - Resulting and expecting behavior
 - Recording the bug
 - Test Data
 - System Information
 - Impact

Qualities of good bug report

- **Having a clearly specified Bug Number:** Always assign a unique number to each bug report. This, in turn, will help you identify the bug record.
- **Reproducible:** If your bug is not reproducible, then it will never get fixed.
- **Be Specific:** Do not write an essay about the problem.
- **Ensure availability after reporting:** No matter how well-written a bug report is, if the person who submitted it is not available, it is probably useless.
- **Collect visual evidence:** While written details are useful, including visual information in defect reports can help during testing and repairing.
- **Test the same bug occurrence on other similar modules:** Sometimes the developer uses the same code for different similar modules. So there is a higher chance for the bug in one module to occur in other similar modules as well.

How To Report A Bug?

- ❖ **Component:** These are the major sub-modules of the product.
- ❖ **Product:** In which product you found this bug?
- ❖ **Platform:** Mention the hardware platform where you found this bug. The various platforms like 'PC', 'MAC', 'HP', 'Sun' etc.
- ❖ **Operating system:** Mention all the operating systems where you found the bug.
- ❖ **Priority:** When should a bug be fixed? Priority is generally set from P1 to P5. P1 as “fix the bug with the highest priority” and P5 as ” Fix when time permits.
- ❖ **Severity:** This describes the impact of the bug.
 - **Blocker:** No further testing work can be done.
 - **Critical:** Application crash, Loss of data.
 - **Major:** Major loss of function.
 - **Minor:** Minor loss of function.

How to Report a Bug

- ❖ **Assign To:** If you know which developer is responsible for that particular module in which the bug occurred, then you can specify the email address of that developer.
- ❖ **URL:** The page URL on which the bug occurred.
- ❖ **Description:** A detailed description of the bug.
 - **Reproduce steps:** Clearly, mention the steps to reproduce the bug.
 - **Expected result:** How the application should behave on the above-mentioned steps.
 - **Actual result:** What is the actual result of running the above steps i.e. the bug behavior?
- ❖ **Proof of bug**

Bug Tracking Tools

- ❖ Jira
- ❖ Backlog
- ❖ Redmine
- ❖ Trello
- ❖ Bugzilla
- ❖ Mantis
- ❖ Trac
- ❖ BugHerd
- ❖ Monday

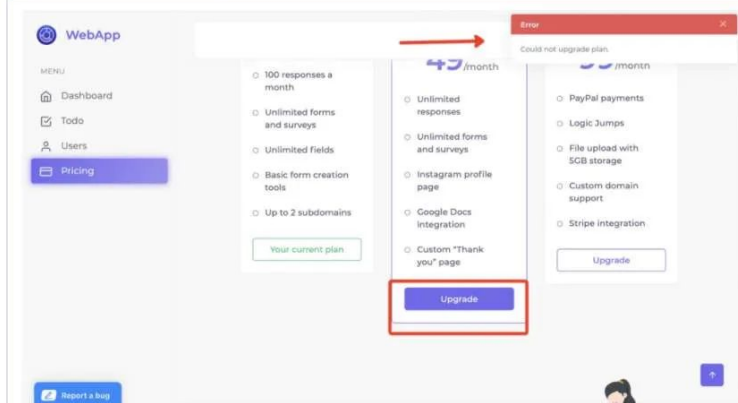

I could not upgrade? #1
